Heroes Behind the Scenes

Meet Cesia, a Crucial Part of Our Team

Here at Snellings Law, we want our clients to know they are valued and cared for. Getting people on the road to recovery is what we pride ourselves on most. We are always looking out for your best interest. Our main goal is to make our clients feel better than they did prior to an incident, and it takes a special group of people to make this happen. We like to call those people heroes.

When you think of a hero, you often think of someone who helps people in a time of need. A hero is a person who is admired or idealized for courage, outstanding achievements, or noble qualities. Our personal hero here at Snellings Law is Cesia Posadas.

Cesia was born and raised in East Texas and moved to Dallas about a year and a half ago. She graduated from Texas A&M University with a science major. Although she has a great love for agriculture, she was born for something else, and her dream was in the big city of Dallas! Cesia has always had a keen interest in law, and she chose us to fulfill her dream.

Cesia completely thrives in our environment and gets along with all kinds of people. She handles the most difficult situations with delicacy and ease. It is safe to say she wears many hats. Cesia is in charge of conversing with all of our new and potential clients. She also gathers crucial information and makes sure we have all of the information prior to each consultation. Cesia acts as the "middleman" between us and our clients.

"Snellings Law is such a rewarding place to be a part of," Cesia tells us. "I get to help so many people while they are going through such difficult and traumatic times in their lives. Being able to take their stress away and show them they are cared for is definitely my favorite part of my job."

During her free time, Cesia is a very active person. She finds great joy in playing tennis, and she is also an avid pickleball player! Since Cesia is fairly new to Dallas, she likes to explore by trying out new restaurants with her friends. Although, she does miss the food from her hometown.

Cesia has been with Snellings Law for a little over a year, yet she is such an important asset to our team.

"Snellings Law has been so supportive of me and my journey. I am so thankful to be a part of this amazing and positive community. They have built me from the ground up, and I cannot thank them enough for being such great team members," she says.

Thank you Cesia! We are so fortunate and blessed to have you as a member of our Snellings Law team and family! We appreciate all of your positivity, skill, and passion for the firm and our clients!

- Scott Snellings

Driven To Help

CRAZY LAWSUITS SHOWCASE STRANGE REALITIES

Just because the law enforces order doesn't mean all the cases that get tried aren't a little silly. Let's delve into the realm of legal oddities with three particularly strange lawsuits, each bizarre enough to make you wonder if reality is stranger than fiction.

Subway's Knife Sandwich Fiasco

In a twist that sounds like a fast-food horror story, a man discovered a 7-inch serrated plastic knife baked into his Subway sandwich. This alarming find led him to file a whopping \$1 million lawsuit against Subway. Beyond the shock of the knife, he claimed the sandwich caused him severe stomach aches due to food poisoning. The case was eventually settled, but it remains a reminder of the potential dangers lurking in everyday meals.

Weatherman's Forecast Flub

Weather forecasts are often taken with a grain of salt, but not in the case of an Israeli woman who sued a weatherman for getting the forecast wrong. The weatherman predicted sunshine, but it rained, leading the woman to dress inappropriately and catch the flu. She sued for \$1,000, citing missed work and medication expenses. Surprisingly, she won the lawsuit against the TV station, setting a precedent that weather predictions might be more legally binding than previously thought.

The Victoria's Secret Mishap

A routine shopping trip to a Victoria's Secret store turned perilous for a customer when a metal piece from a pair of panties she was trying on flew off, striking her in the eye. This incident resulted in a cut cornea, which required a topical steroid treatment. Her lawsuit against the lingerie giant highlighted the potential hazards that can arise from seemingly innocuous products. The case raised questions about product safety and the responsibilities of retailers to ensure their products are free from such defects.

These lawsuits showcase the unexpected and often bizarre nature of legal disputes. They remind us that in the world of law, almost anything can become a case, no matter how outlandish it may seem.

Smile and Don't Run Out of Gas

WEIRD LAWS AROUND THE GLOBE

Let's embark on a journey around the globe to uncover some of the most unique laws on the books, from Arizona to Egypt. Protecting plants and birds, enforcing public cheerfulness, and preserving cultural dance traditions are among some of the examples of unique legislation we've uncovered.

Arizona's Cactus Custodians

In Arizona, the local cactuses are not just plants; they're legally protected entities. It behooves everyone to avoid harming these prickly residents, as you could face up to 25 years in prison. This law serves as a stern reminder to treat nature with respect. The bottom line to stay out of jail? Don't cut the cactus. Period.

Australia's Homing Pigeon Heroes

Down under, harming a homing pigeon isn't just frowned upon; it's illegal. These birds, known for their remarkable navigation skills, are protected by a law that imposes a fine of \$250 for causing them harm. It's a testament to Australia's reverence for its avian inhabitants.

Germany's Run-Out-of-Gas Ban

The idea of a highway where drivers can go as fast as they want is a reality on Germany's Autobahn. But it comes with a peculiar (yet understandable) rule: No matter what you do, *don't run out of gas!* Not only would it be a safety issue, but you'll also face a hefty fine. So, fill up before heading out.

Milan's Smile Mandate

In Milan, Italy, they take fashion seriously. Smiles are at the top of their list, too. An old, never-repealed city regulation from Austro-Hungarian times mandates that everyone must smile at all times, barring those attending funerals or spending time in a hospital. This unique law, originating from an idea by Luigi Fabio, is aimed at ensuring a cheerful public demeanor. So, when in Milan, keep smiling — it's not just good manners, it's the law!

Egypt's Belly Dancing Decree

In Egypt, the art of belly dancing is a cultural treasure and is also subject to gender-specific legislation. Here, men are prohibited from

performing this traditional dance. This law highlights the unique cultural and historical significance of belly dancing in Egypt and the gender roles traditionally associated with this mesmerizing art form.

These laws are a testament to the diverse nature of legal systems across the world. They remind us that the rule of law can sometimes be as varied as the cultures they represent.

TAKE A *BREAK*

PUFF PASTRY BERRY HEARTS

Inspired by Weelicious.com

Ingredients

- 1 package frozen puff pastry, defrosted
- 1 cup heavy cream
- 1 tsp powdered sugar
- 1/2 cup fresh raspberries (or berries of your choice)

Directions

1. Preheat oven to 400 F. Unfold the puff pastry and use a heart-shaped cookie cutter to cut into heart shapes.
2. On a baking sheet, place puff pastry hearts and bake for 10–12 minutes or until golden brown.
3. In a standing mixer, whip the cream on medium-high speed for 2–3 minutes. Add the powdered sugar and beat on high for 30 more seconds or until thick and fluffy.
4. Remove hearts from the oven and allow to cool completely. Slice each heart in half between pastry layers to create 2 hearts. Top the bottom half with whipped cream and berries, and place the other half on top to form a sandwich.

Teach Kids to Navigate Conflict

A PARENT'S GUIDE TO PEACE

When you hear the word “conflict” in the context of kids, you might think of schoolyard bullies or having to ground your kid. However, children have their own disputes, ranging from toddler tussles over toys to digital duels between pre-teens. While they are undeniably challenging, conflicts provide kids the chance to learn life lessons. They encourage young minds to put on their detective hats, explore new perspectives, reevaluate old ideas, and even cement the bonds of friendship. Use the following strategies to equip your child with the superpower of conflict resolution.

Empower Peacemakers

Conflict resolution skills are the compass that guides kids through the maze of life’s disputes. Here’s a map to help your child navigate these tricky waters:

- **Pause and Reflect:** Teach your child the art of taking a deep breath and calming the storm within. Reacting in a frenzy of anger is like tossing gasoline on a fire.
- **Speak Your Truth:** Encourage your child to explain their side of the story in clear and simple words. Understanding each other’s viewpoints is key to conflict resolution.
- **Get Creative:** Foster their inner Picasso of problem-solving. Encourage them to brainstorm solutions that cater to everyone’s wishes, like a culinary mastermind crafting the perfect dish.
- **Choose Respect:** Teach your child the importance of treating others kindly, even when disagreements threaten to capsize the boat.

These steps help kids patch up the current squabbles and cultivate emotional intelligence — a shield against future conflicts and a bridge to tolerance.

Foster ‘fun’ conflict-resolution experiences in the home.

Parents wield the magic wand in conflict resolution play. Organize family activities that mimic real-life conflict scenarios, like board games with rules that spark disagreements. These friendly bouts teach your child the art of keeping their cool under pressure. And don’t forget about the power of make-believe! Encourage your child to stage a conflict resolution drama. It’s not just fun; it’s a crash course in diplomacy.

Remember, every successful conflict your child conquers will give them confidence. By imparting these skills early on, you gift them tools for a lifetime of harmonious interactions, both personally and professionally. So, let’s embark on this valuable conflict resolution journey together — the world will be a better place.

HISTORY OF PREGNANCY TESTING

FROM SEEDS TO SCIENCE

From ancient times, human ingenuity has been pivotal in unraveling medical mysteries, and pregnancy testing is a particularly fascinating example.

In Egypt, around 1350 BCE, pregnancy testing blended mysticism and early science. Women would urinate on wheat

and barley seeds, an intriguing method that modern research has shown to be surprisingly accurate, with a 70% success rate. If barley grew, it indicated a male child; wheat signified a female.

Across different cultures, unique approaches emerged. The Greeks, influenced by Hippocrates, developed diagnostic theories based on the four bodily humors. In India, ancient Ayurvedic texts detailed pulse examination techniques for various conditions, including pregnancy, showcasing remarkable observational abilities and a deep understanding of the human body.

The Middle Ages saw a curious amalgamation of superstition and the beginnings of scientific inquiry. "Piss prophets" examined urine for its color and clarity, practices that were precursors to today's urinalysis.

A significant advancement came in the 20th century with the discovery of the hormone hCG. This breakthrough led to the first reliable home pregnancy tests in the 1960s, marking a dramatic shift from rudimentary ancient methods and offering greater accuracy and privacy.

This journey from ancient seed tests to sophisticated modern diagnostics illustrates the evolution in our understanding of the human body. Those early tests laid the groundwork for the reliable techniques we use today, inspiring us to continue improving our medical knowledge and practices.
